Commercial name & Language

This system allows the user to create commercials names and languages. The languages need to be co-ordinated with SmartBilling team as it requires some hardcoding activities in the back of the system. This process is self explanatory:

-

The result obtained is shown at the company dashboard information. In the example below, we have created a company with 3 commercial names and brands in 2 languages: English and French. The system architecture is prepared to be multilingual and allows you interact in any language (provided you load the translations of the information you want to show in the invoice). In case the platform to show in a different language to English or French, a Change Request will need to be submitted to Smartbilling for evaluation.
